

Dear Genetic twin,

I like the way that sounds, I was very excited to read the letter you sent me . I shared it with my family and friends.

I am doing very well now. My doctors are very pleased with my progress. I went back to work last November, been getting stronger every day. I owe it all to you and it makes me feel good inside to know that there are people like you out there in this world we live in! You saved my life and I will never be able to thank you enough!

It is amazing that our stem cells were so closely matched. Did they tell you that? Doctors told me only a sibling is usually that close to perfect.

I will give you a little insight on who I am. I'm not sure how much they will edit, but I will give it a shot. I hope some day we can either write, email, or text each other on a more personal basis.

Anyway, I am 47 yrs old and I live in a small town in the state of I am married and have
My youngest two still live at home, I am also a
grandpa, I have My wife is a nurse and I work as a material handler. Some
of my hobbies are playing and watching baseball. I have done some coaching, but now my
kids are all older, so I do umpiring in the summer months.
I find it very interesting you have bees and would be interested in seeing some of your wood
work in the future when we can send pictures.

Once again, I can not thank you enough for what you have done for me. I thank you and my family thanks you. I hope to hear from you soon!

Best regards,

Your genetic twin
